

## **Water Education Project Officer November 2009**

- Increase in education of catchment health issues at a primary, secondary and college levels.

Organised and ran 'Macroinvertebrate Survey' activity at Lanyon High School (19/11)

- Increase in education of source water issues at a primary, secondary and college levels.

(See above) Organised and ran 'Macroinvertebrate Survey' activity at Lanyon High School (19/11)

- Increase in school excursions to venues and activities highlighting catchment and source water issues.

(see above) Organised and ran 'Macroinvertebrate Survey' activity at Lanyon High School (19/11)

- Increase in students "*Acting for an environmentally sustainable future*" as identified by the Essential Learning Achievements 20 (ACT Dept Education Curriculum)

Met with Edwina Richardson from the NRM to discuss my involvement and support with their 'Wetlands' Education package.

Held a 'Steering Committee' meeting with stakeholder representatives from ActewAGL, NRM and SACTCG, to discuss aims and objectives of this project.

Minutes circulated from this. Matters arising are being addressed regarding the scope of the Projects Officers commitments.

- Increase in teacher awareness of learning activities and opportunities that address objectives of ELA 20 as identifies by the ACT Department of Education.
