

Which trees
do you
recognise?

Kurrajongs
in flower
- the bees
love them

the seed pods are fun
but watch out for a reaction
to the hairs inside

Eucalyptus Rossii

students from
Gilmore Primary School
planted them in 2021 to replace
the dying Eucalyptus Blakeleyi

Which wattles
do we like?
Black wattle - yeh
Silver wattle - yeh
Golden wattle - yeh
Cootamundra wattle - nah

Which grasses do we like?

Red Leg grass – yeh
Kangaroo grass - yeh
African Lovegrass - nah

Dianella

More than one sort
growing wild on the hill

Native Mint Mentha Diemenica

You will know it from
the strong minty smell if you tread on it

Blue cranesbill

a native growing alongside
the pink introduced one

Native
raspberries

Bursaria
host to a wasp that
fights eucalypt
die back

Indigofera

In spite of the
colour of its
flowers,
produces a
golden dye

False
Sarsparilla
Hardenbergia violacea

Twining
Glycine
or Glycine clandestina
showing up
when in flower

Now see if you can
spot the groundcovers
the children planted in 2021....

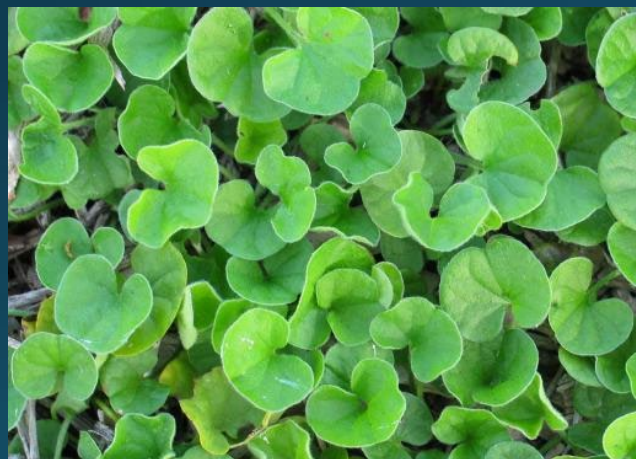

Myoporum parvifolium
Creeping Boobiella

Scleranthus biflorus
Cushion Bush

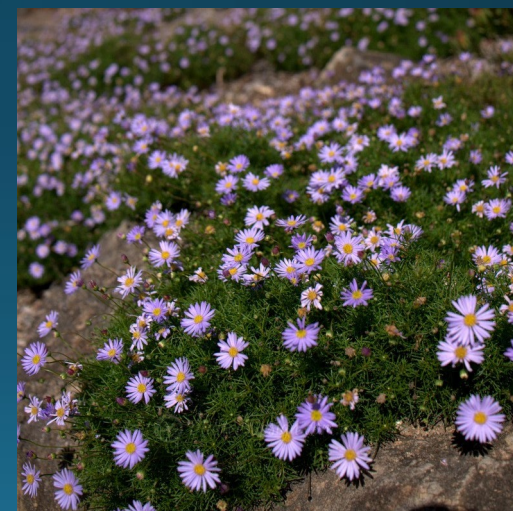

Leucochrysum albicans
Hoary Sunray

Dichondra repens
Kidney weed

Chrysocephalum apiculatum
Common Everlasting

Brachyscome multifida
Native Daisy
